

MODEL 1425 TRACK

14" Capacity Horizontal Grinder

The Model 1425 track is designed with the same features as the tow-behind unit and made to travel on a **Caterpillar 308 steel track undercarriage**. With this durable track drive, the 1425 can travel through a variety of terrain settings reducing the need to move material to the machine. The track version also makes it easier to reposition the machine on a landing by simply using the standard radio remote control to move the machine. Featuring the same down turning cuttermill, cutterbody / tooth options and a variety of screen size options like our larger horizontal grinders, the 1425 will **efficiently** process a variety of wood waste in a valuable end product.

MAXIMUM PRODUCTION

Every feature on the 1425 is designed to maximize production from this compact package. The down turning cuttermill works with gravity and the feedwheel to control material. Cutterbodies correctly size material as it's fed into the machine, saving on wear and tear while increasing production. And the replaceable screens let operators make a variety of end products. All these features are present on the larger Bandit horizontal grinders – and they're all available on the 1425 too!

COMPACT YET CAPABLE

The Model 1425 can process a wide variety of materials, from tree brush and even some whole trees to sawmill tailings, logs and pallet waste. The end product can then be turned into beautiful colored mulch with the Color Max system!

3-SPEED PROPORTIONAL DRIVE

A 3-speed proportional feed system is standard allowing the machine to run at optimal production levels while reducing wear on the machine. As the engine begins to lose RPM the feed system will slow down and once the engine reaches its lowest RPM the system will reverse until the engine regains full RPM.

DIMENSIONS

Capacity:	14"	36 cm
Opening:	20" tall x 25" wide	50.8 cm x 63.5 cm wide
Cuttermill:	36" dia. x 25" wide	91.4 cm dia. x 63.5 cm wide
Teeth:	14	
Feed Wheel:	(1) 15.75" diameter	(1) 40 cm diameter

Infeed Conveyor: Single speed, 7' long x 24" wide (213.4 cm long x 61 cm wide) heavy duty rubber infeed conveyor

Discharge Conveyor: 18" wide (45.7 cm wide) cleated rubber with 7' (213.4 cm) stacking height

COMMITTED TO QUALITY & PRODUCTIVITY

Since 1983, Bandit has manufactured equipment for a multitude of wood waste processing markets. The vision since the beginning, is to build quality, highly productive, easy to maintain equipment providing years of dependable service.

The commitment for quality, innovation and dedication is instilled in every employee and is one of the main reasons why Bandit became an Employee-Owned Company (ESOP) in 2018. These core values ensure each Bandit machine will leave the factory ready to exceed your expectations.

MODEL 1425 TRACK FEATURES

- Massive Throat Opening**
 This machine features a large opening for such a compact unit, allowing for large material to be processed
- Unique Downturning Cuttermill**
 The Beast's unique cuttermill turns downward, working with gravity and the feedwheel roller to grind material
- Color Max Compatible**
 Bandit's Color Max system creates beautiful mulch using less water and colorant than the competition
- Changeable Screens to Help Size Material**
 Operators can select a screen to help correctly size the material on the first pass – saving time and money
- Highly Maneuverable**
 All track and grinding functions are controlled by a standard radio remote.
- Optional Steel Infeed Conveyor**

Bandit Offers a Complete Line of Tree Care Equipment:
 Hand-Fed Chippers • Stump Grinders • Whole Tree Chippers
 Horizontal Grinders • Attachments
